

Presentation of Specification to TSG or WG

Presentation to: TSG RAN Meeting #6
Document for presentation: TS 25.324, Version 2.0.0
Presented for: Approval

Abstract of document:

Broadcast/Multicast Control (BMC)

The present document provides the description of the Broadcast/Multicast Control Protocol (BMC). This protocol adapts broadcast and multicast services on the radio interface.

Changes since last presentation to TSG RAN Meeting #5

This Technical Specification is providing the complete set of procedures and contains the specification of all BMC messages.

The BMC protocol supports additionally the ANSI 41 SMS Cell Broadcast Service.
