TSG-RAN Meeting #6
Nice, France, 13 – 15 December 1999

TSGRP#6(99)606

Source: TSG-RAN WG2

Title: LS on Header Compression and IETF

To: TSG-RAN
CC:

_____

RAN2 has noticed that RAN has received a liaison from the 'Robust header compression Working Group' of IETF. The liaison informs RAN that IETF is specifying header compression algorithms with a time plan well suited for release 2000. Since RAN2 has decided to only use header compression algorithms specified by IETF (by means of making references to IETF RFCs in the PDCP specification), RAN2 feels that it is important to have working relations to the 'Robust header compression working group' of IETF.
