

Presentation of Specification to TSG or WG

Presentation to: TSG-RAN Meeting #10

Document for presentation: TR 25.844 Version 1.0.0

Presented for: Information

Abstract of document:

The present document is a technical report that summarises the work on the UTRAN Release 2000 work item “Radio Access Bearer Support Enhancements”. The work items comprises of four areas of study:

- 1) Robust header compression
- 2) PDCP multiplexing
- 3) Variable Iu frame formats and unequal error protection over Uu
- 4) Channel type switching per logical channel

Each study area includes the requirements of the proposed feature, a description of the basic mechanism and a discussion of the issues involved. A recommended solution is provided and impacts to other RAN WGs are analysed.

Changes since last presentation to TSG-RAN Meeting:

First presentation to RAN plenary.
