

Presentation of Specification to TSG or WG

Presentation to: TSG-RAN Meeting #10

Agenda item: 6.6.11 USTS(Uplink Synchronous Transmission Scheme)
(WG1)

Document for presentation:

Presented for: Information

Abstract of document:

This technical report captures the results of the work on the Release 4 study item "Uplink Synchronous Transmission Scheme". It includes status for USTS related work at WG1 and work plan are described.

Changes since last presentation to TSG-RAN Meeting:

We submit study report including performance evaluation results in WG1 #16 and #17 meeting. Also, we proposed temporary study report for USTS including handover method, timing synchronization, code allocation method, and performance. In WG1 meeting, some issues have been discussed regarding USTS performance and flexibility. Currently, a discussion on handover method and Node B complexity is going to perform.

Outstanding Issues:

Contentious Issues:
