Progress Report since the last TSG (for all involved WGs):

TR v0.1.1 was submitted to RAN3 #36 in Paris, France, but was not treated due to lack of time. It was resubmitted to RAN3 #37 in Budapest, Hungary, as R3-031106 and was agreed as TR 25.901 v0.2.0 in R3-031187.

A company contribution of the TR was also submitted as R3-031107. This document was based on v0.1.1, and also contained many semantic changes, comparative analysis of the UTRAN NACC signalling architecture, a possible new RNSAP procedure, and a section on adaptation of GERAN RIM procedures for use across the lu interface. This document was agreed after revision as v0.2.1 in document R3-031189 and resubmitted as v0.3.0 in document R3-031246.
