3GPP2 CORRESPONDENCE

Ms. Betsy Covell
Chair, 3GPP2 TSG-X
Alcatel-Lucent
tsgx_chair@3gpp2.org

November 18, 2009

**Re: 3GPP2 TR-196 Management Objects and Attributes for
cdma2000^{®1} Femtocell Devices**

Dear Broadband Forum BBHome Working Group:

3GPP2 is currently nearing the completion of the first phase of standardization for femtocell devices based on cdma2000 1x and HRPD (EV-DO) radio technologies. As part of this effort, 3GPP2 has chosen a femtocell device management and operations architecture that utilizes Broadband Forum's TR-069 family of standards, as well as TR-196 as the overall framework for femtocell device management objects. As described in our previous liaison, 3GPP2 is defining the management object structure and attributes that need to be added to the TR-196 framework to support cdma2000 1x and HRPD radio technologies.

We are pleased to indicate that 3GPP2 has met the first major milestone in the proposed workplan, and we are attaching a working baseline for the 3GPP2 objects and attributes for BBHome consideration. Our objective is to get feedback and comments on the structure, attributes, formatting, etc. in order to make the development of the formal XML structure go smoothly during the first quarter of 2010 (as described in our proposed workplan). Any feedback or recommendations from BBHome or BBF member companies would be appreciated.

¹ *cdma2000[®] is the trademark for the technical nomenclature for certain specifications and standards of the Organizational Partners (OPs) of 3GPP2. Geographically (and as of the date of publication), cdma2000[®] is a registered trademark of the Telecommunications Industry Association (TIA-USA) in the United States.*

We are looking forward to continuing our collaborative effort to incorporate support for cdma2000 femtocell devices in the planned Amendment 1 of TR-196. If you have any questions, please feel free to contact Douglas Knisely, Chair, 3GPP2 TSG-X Femto Management Ad Hoc Group (dknisely@airvana.com), who has been designated as the 3GPP2 liaison to the BBF for these purposes.

Regards,

Betsy Covell
Chair, 3GPP2 TSG-X
