TSG-RAN Working Group 1(Radio) meeting #4
Yokohama, Japan, 19 – 20 April 1999

TSGR1#4(99)385

Agenda Item:	5.5
Source:	**editor**
Title:	Text proposal regarding S1.13 figures 1 and 2 channelisation code
Document for:	agreement

In former meetings changes to S1.13 were agreed which used the number range convention 1..N for channelisation codes.

It has recently been discovered that figures 1 and 2 use the convention 0..N for indicating DPCCH and DPDCH codes and this has led to confusion amongst readers and this should be modified to increase clarity.

I propose that the DPCCH have code 'c' rather than '0' and the DPDCH code identifiers be 'd#' rather than '#' (a numeric).
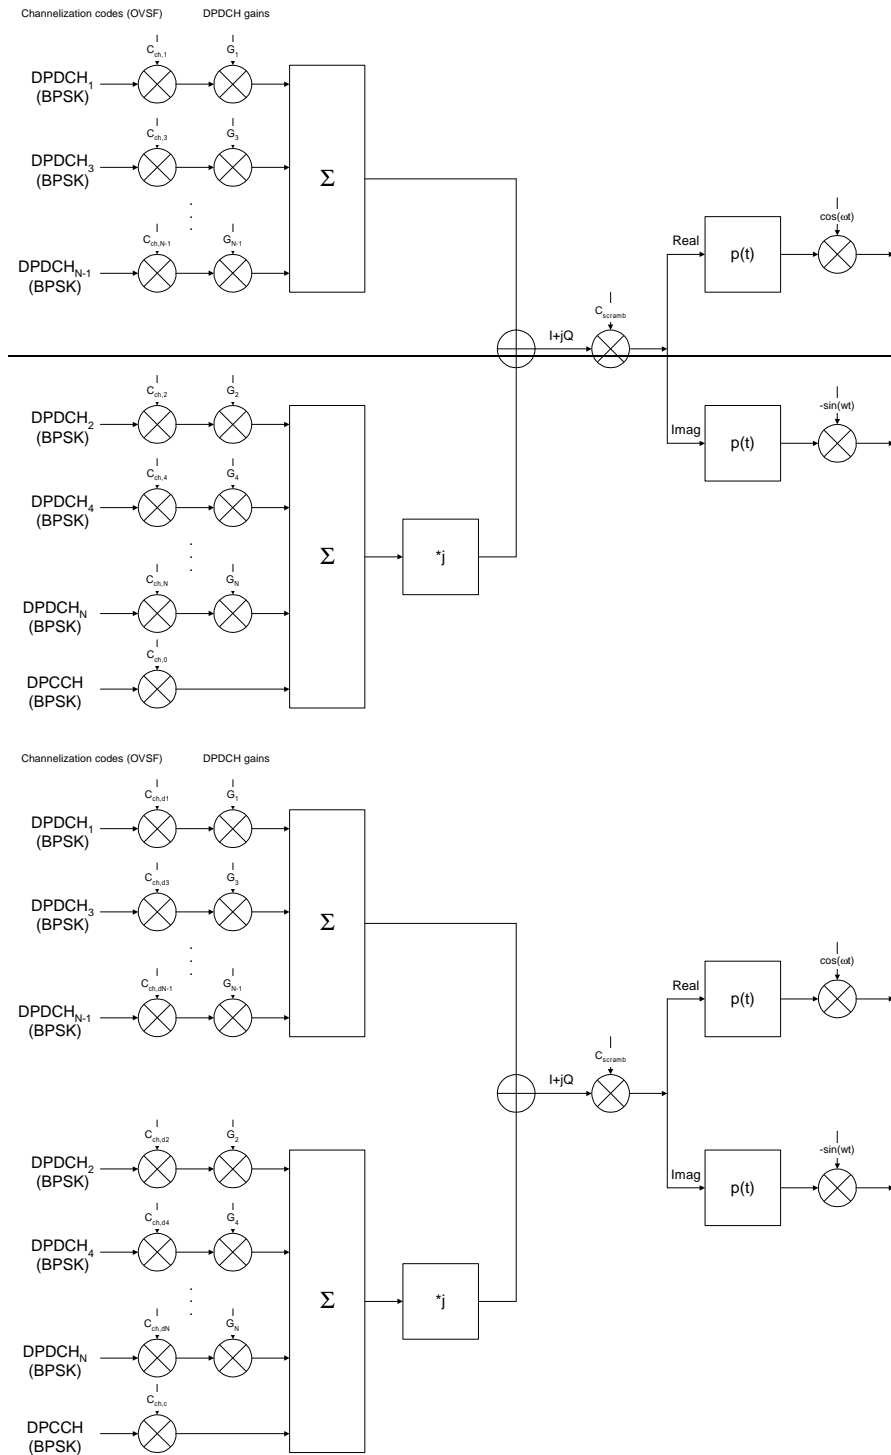

Text proposal

Figure 1   Spreading/modulation for uplink DPDCH/DPCCH for user services less than or equal to 1024kbps in the 5MHz band
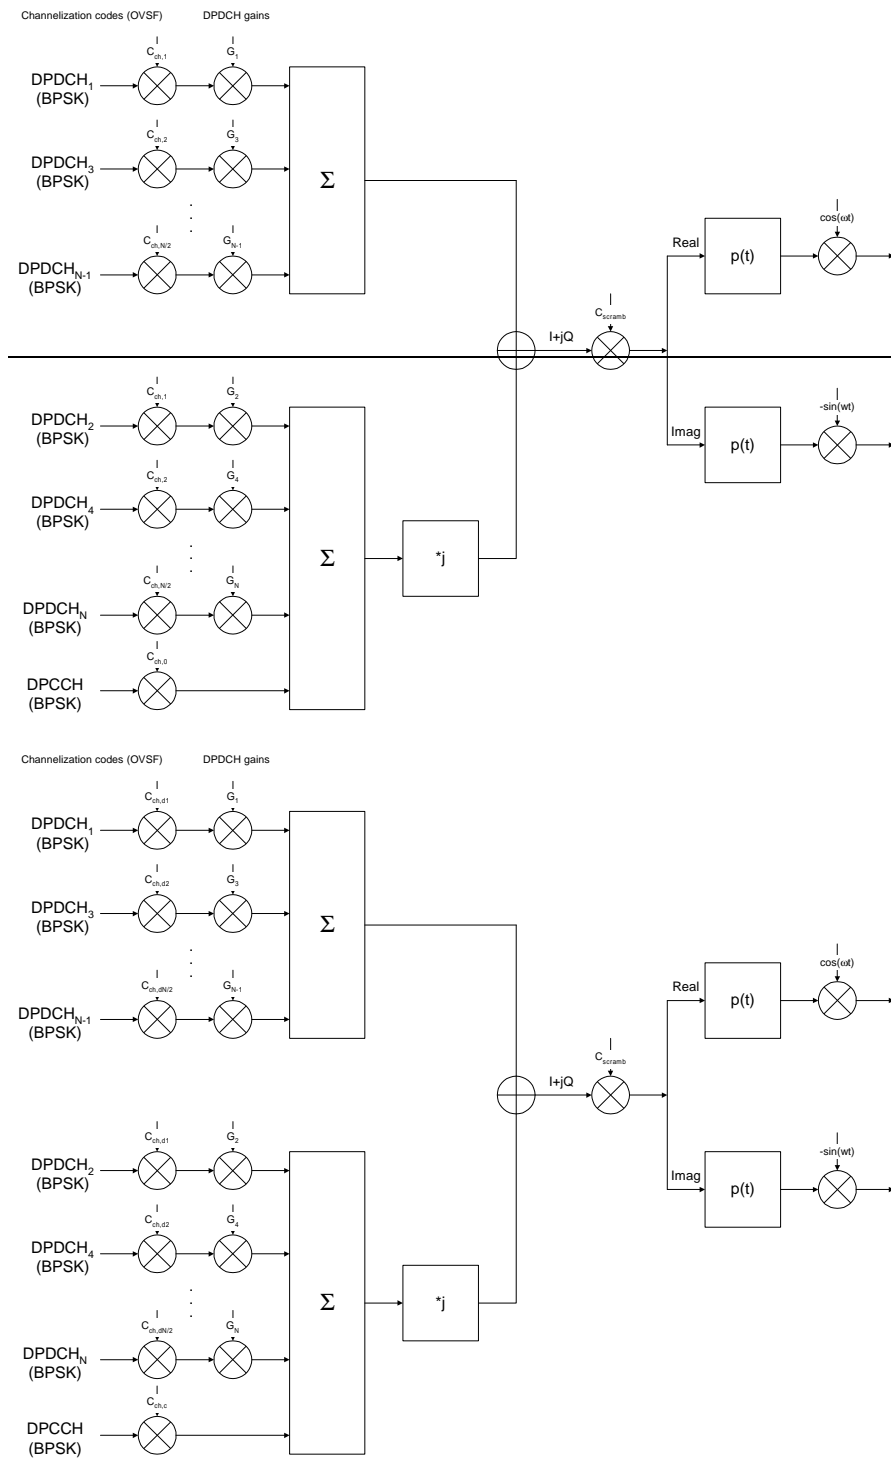

Figure 2.   Spreading/modulation for uplink DPDCH/DPCCH for user services at 2048kbps in the 5MHz band
