TSG-RAN Working Group 1 meeting No. 10
January 18 – 21, 2000, Beijing, China

TSGR1-00-0182

Source: TSG-RAN WG2

Title: Response to LS (R1-99L63) on Transmitting AMR Mode Command bits

To: TSG-RAN WG1

CC: TSG-SA WG4

Contact Person: Joakim Bergstrom
                             E-mail: joakim.bergstrom@era.ericsson.se
                             Tel: +46 8 404 7396

_____

RAN WG2 would like to thank RAN WG1 for their question, and would also like to inform that currently two different mechanisms are available in the RAN WG2 specifications.
For transmitting the AMR mode command bits, there is one slow mechanism not requiring a separate transport channel and one fast mechanism on a separate transport channel.
