Title: CR 25.215-027: Naming of BER/BLER mapping

Document for: Decision

The usage of the term dB is commonly used to indicate 10*Log(P1/P2). In the definition of the mapping for Transport channel BLER and Physical channel BER in TS 25.215, the term dB is used to indicate that the mapping is made in a logarithmic scale. However the mapping is not made using 10 times log as normally used in the definition of the dB-scale. To avoid confusion this CR proposes to replace the term “dB” with the term “LOG” in the definition of the mapping for the BLER and BER measurements in TS 25.215.
