

TSG-RAN Working Group 1 meeting No. 12
April 10 – 13, Seoul, Korea

TSGR1-00-0483

TSG RAN 4 Meeting #9
San Diego, California, USA
February 29 - March 3

TSGR4#11(00)0322

Liaison Statement on Uplink BLER measurement

From: R4
To: R2, R3
Copy: R1

R4 has reviewed the list of UTRAN measurements in order to set the related accuracies.

R4 did not assign an accuracy to the Transport Channel BLER measurement since it is not clear to R4 if this measurement has to be performed by the Node B or by the RNC, and what is its relation with the CRC check result.

The Node B is quoted as the source of the measurement inside 25.302 v 3.3.0, while it's not clear if the measurement is currently supported by the NBAP signaling.

R4 is seeking guidance on the status of the Transport channel BLER measurement in order to assess the appropriate accuracy if the measurement is agreed to be performed in the Node B.
