**Cc:** TSG T WG2

**Title:** Answer to LS to RAN WG2 on USCH requirement for TDD

---

RAN2 has received the LS from RAN1 about the baseline capabilities for USCH. RAN2 has also received the information that the requirements on RACH payload can be fulfilled for TDD and therefore informs RAN1 that the USCH is seen now part of the service capabilities of the UE.

RAN2 informs also that the channel characteristics given in the annex of the LS from RAN 1 will be taken into account by updating the TS25.302: Services provided by the physical layer.
