

TSG-RAN Working Group 1 meeting #7
Hannover, Germany
August 30 – September 3, 1999

TSGR1#7(99)e34

To: TSG RAN WG2
Source: TSG RAN WG1
Title: Liaison statement on simultaneous AICH and S-CCPCH

RAN WG1 would like to thank RAN WG2 for the liaison statement in TSGR1#7(99)c41, "LS answering WG1's comments on 25.302".

It was noted by RAN WG1 that RAN WG2 sees support of simultaneous AICH and S-CCPCH reception as very important. Following a short discussion, RAN WG1 came to the conclusion that this simultaneous reception should be supported.

Hence, RAN WG1 can inform RAN WG2 that RAN WG1 considers simultaneous reception in the UE of one AICH and one S-CCPCH a UE baseline implementation capability. This is not documented directly in RAN WG1 specifications, instead it is suggested that this decision is documented in TS 25.302 by removing the FFS item.
