Title: LS to RAN WG1 answering to T199105
To: TSG RAN WG1
CC:
Document for: Information

1. INTRODUCTION

TSG-T WG1 RF SWG has reviewed the T1R99091 "Liaison statement to TSG-R WG4 and TSG-T WG1 concerning the changes made to Tx diversity concept in the TSG-R WG1 meeting #7". The LS was sent by RAN WG1 (TSGR1#7(99)d13). The LS was noted also in T WG1 (T199105).

2. IMPLICATIONS TO THE SPECIFICATIONS

2.1 TS-34.121 (v.1.2.0) Terminal Conformance Specification, Radio Transmission and Reception (FDD)

The tables 6.8.2.1 and 6.8.2.2 have to be modified according to the changes made by RAN WG4 in specification 25.101. These changes are only editorial. The test method for TX diversity is not defined in T WG1 yet, so the changes made in RAN WG1 and RAN WG4 do not have any impact to test method.

2.2 TS-34.122 (v.0.1.0) Terminal Conformance Specification, Radio Transmission and Reception (TDD)

The current testing specification for TDD does contain nothing concerning testing of TX diversity, so changes made in RAN WG1 do not have any impact to the specification.
