Copy: RAN WG1
Title: Response to LS on UE measurement abilities

RAN WG4 thanks RAN WG2 about the information exchanged between WG1 and WG2 regarding the UE measurement abilities.

RAN WG4 would like to inform RAN WG2 and WG1 that currently RAN WG4 is working on UE measurement requirements for the case of single type measurement. On this area good progress has been made in our last meeting. These definitions will be included into the definition of the allowed time for the measurement.

RAN WG4 would like to know the rationale of each measurement in order to derive measurement accuracy.

RAN WG4 will inform about the progress in this issue in future.
