To: TSG RAN WG1
Title: PCH and PCH/PICH associations in 1.28Mcps
Document for: Discussion and Approval

1. Summary

There is no difference in the concept of the paging channel and for the associations of PCHs to PICHs between the 1.28 Mcps TDD and 3.84Mcps TDD. Therefore its proposed to reference the respective 3.84 Mcps TDD sections.

2. Proposal

It's proposed to discuss and to include the following text proposal into the section 8.2.2 'The Paging Channel (PCH)' of the CR for TS25.221.

8.2.2 The Paging Channel (PCH)

The mapping of Paging Channels onto S-CCPCHs and the association between PCHs and Paging Indicator Channels is the same as in the 3.84 Mcps TDD option, cf. 6.2.2 'The paging Channel' and 6.2.2.1 'PCH/PICH Association' respectively.

8.2.2.1 PCH/PICH Association
