

TSG-RAN Working Group 1  
Las Vegas  
February 26-March 2, 2001

## ***TSGR1#19(01)0413***

**Agenda item:** AH24, HSDPA  
**Source:** Lucent Technologies.  
**Title:** Text proposal in TR for Semi-static Code Space Division of physical HS-DSCH  
**Document for:** Discussion and decision

---

Based on the contribution R1-01-309 presented in TSG RAN1 #19, the following text is proposed for inclusion in HSDPA RAN 1 TR in section 6.6.2 "Associated Downlink Signaling" at the end of the second bullet item:

"The amount of signaling overhead depends on and increases with the flexibility in the code allocation to different UEs as set up by higher layers".
