TSG-RAN WG3 Meeting #5
Helsinki, Finland July 4th - 9th 1999

TSGR3#3(99)794

Source: TSG RAN WG3
To: 3GPP CN1
CC: TSG RAN WG2
Title: Response to LS on the MSC issues with GSM 04.08

Document for: -

TSG RAN WG3 (responsible for the UTRAN Architecture) acknowledges reception of the Liaison Statement from 3GPP CN1 and have discussed the points outlined. The following conclusions were made:

With reference to the Uplink and Downlink L3 messages, RAN WG3 believe that there are certain aspects of these subjects that may impact upon SRNC Relocation procedures and they are being considered at present. However insufficient study has been given to these issues thus far.

TSG RAN WG3 believe that the bulk of these issues raised are applicable to the experts of TSG RAN WG2.

RAN WG3 will inform CN1 of any further additions to the development of the UTRAN.
