TSG-RAN Working Group 3 meeting #2   **TSGW3#2(99)154**
Nynäshamn, Sweden, 15th - 19th March 1999

Agenda Item: 17

Source: Rapporteur, 3GPP-TSG-RAN-WG3 Iub O&M Ad Hoc

Title: New Proposal for amendment of TSG-RAN terms of
                     reference

Document for: Decision

_____

As a result of the TSG-RAN-WG3 O&M Ad Hoc in Milan on 22/2/1999, an output document was produced recommending a clear scope for the O&M standardisation work on the Iub interface (Document TSGW3#2(99)153). This document proposed an amendment to the terms of reference for TSG-RAN to ensure no conflict exists between TSG-RAN and TSG-SA with regard the Iub O&M work item. The proposed changes were as follows:

> *Iub Specification*

To be replaced by:

> *Specific O&M)*

As agreed at TSG-RAN-WG3 meeting #1 (2-5 February, Bonn), these recommendations were inputted

the proposed changes to the terms of reference were rejected since it was not felt the Implementation Specific O&M was a function of the Iub interface. Alternative text was subsequently proposed and

In summary, the changes made were as follows.

- No changes made to *Iub Specification*
- A new bullet point was added reading:

It is the opinion of the Rapporteur for the TSG-RAN-WG3 O&M Ad Hoc that the above changes do not fully satisfy the requirements of the Ad Hoc, (i.e. the reasons for proposing changes to the terms of

requirements of the Ad Hoc and the correct definition of the Iub interface functions.

Proposal

It is proposed that the following be endorsed by TSG-RAN-WG3 for changes to the terms of reference for TSG-RAN.

- Delete bullet point:

> *Transport of Implementation Specific O&M between OMC-B and Node B*

- Modify bullet point :

> *UTRAN O&M Requirements*

> To now read:

UTRAN O&M Requirements (Including standardisation of Logical O&M and Physical Transport Layer for Implementation Specific O&M of Node B)
