cc: TSG RAN WG 3, RAN WG 1, TSG T WG 2 SWG 3.

**Title: Liaison statement on chosen Logical and Transport Channel
on the Radio Interface for Cell Broadcast Service in UMTS**

TSG RAN2 would like to thank TSG SA 2 for the information about the current status of SMS CB service architecture in SA2.

TSG RAN2 would like to inform TSG SA WG 2, RAN WG 3 and WG 1 that it has chosen the logical traffic channel CTCH which is mapped onto the common transport channel FACH for SMS CB message transmission over the radio interface Uu for Release 99.

TSG RAN2 currently does not see that this decision has any impact on the work of RAN WG 3 regarding the Iub/Iur interfaces and WG 1 regarding the radio interface.
