# Intellectual Property Rights

*[IPRs essential or potentially essential to the present deliverable may have been declared to ETSI/3GPP. The information pertaining to these essential IPRs, if any, is publicly available for ETSI members and non-members, free of charge. This can be found in the latest version of the ETSI Technical Report: ETR 314: "Intellectual Property Rights (IPRs); Essential or potentially Essential, IPRs notified to ETSI in respect of ETSI standards". The most recent update of ETR 314, is available on the ETSI web server or on request from the Secretariat.*

*Pursuant to the ETSI Interim IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in the ETR 314, which are, or may be, or may become, essential to the present document.]*

*Note: The content has to be reviewed according to the 3GPP IPR rules*

---

## Foreword

This Technical Specification (TS) has been produced by the 3<sup>rd</sup> Generation Partnership Project (3GPP).

The contents of this TS are subject to continuing work within 3GPP TSG RAN and may change following formal TSG RAN approval. Should the TSG modify the contents of this TS, it will be re-released with an identifying change of release date and an increase in version number as follows:

Version m.t.e

where:

- m indicates [major version number]
- x the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- y the third digit is incremented when editorial only changes have been incorporated into the specification.

---

## Introduction

*This clause is optional. If it exists, it is always the third unnumbered clause.*

*No text block identified.*

---

## 1 Scope

This document shall provide a description of the UTRAN RNS-RNS (Iur) interface user plane protocols for Common Transport Channel data streams as agreed within the TSG-RAN working group 3.

---

## 2 References

References may be made to:

- a) specific versions of publications (identified by date of publication, edition number, version number, etc.), in which case, subsequent revisions to the referenced document do not apply;
- b) all versions up to and including the identified version (identified by "up to and including" before the version identity);
- c) all versions subsequent to and including the identified version (identified by "onwards" following the version identity); or

d) publications without mention of a specific version, in which case the latest version applies.

A non-specific reference to an ETS shall also be taken to refer to later versions published as an EN with the same number.

## 3 Definitions, symbols and abbreviations

### 3.1 Definitions

*[Editor's note: For list of definitions, see [1]. Only definitions specific to this document are listed below, in order to avoid inconsistency between documents. When list is stable, definitions relevant for this document should be extracted.]*

Common Transport Channels are defined as transport channels that are shared by several users i.e. RACH, FACH and DSCH.

### 3.2 Symbols

### 3.3 Abbreviations

AAL2	ATM Adaptation Layer type 2
ATM	Asynchronous Transfer Mode
CPS	Common Part Sublayer
<a href="#">FP</a>	<a href="#">Frame Protocol</a>
SSCS	Service Specific Convergence Sublayer
SSSAR	Service Specific Segmentation and Reassembly sublayer
<a href="#">UE</a>	<a href="#">User Equipment</a>

## 4 General aspects

### 4.1 Common Transport Channel Data Streams User Plane Protocol Services

*This chapter describes the services that the User Plane Protocols provide such as data transfer, flow control.*

#### 4.1.1 RACH/FACH Data Streams User Plane Protocol Services

## 4.1.2 DSCH Data Streams User Plane Protocol Services

## 4.2 Services expected from data transport

# 5 Frame Structure and Coding

## 5.1 Data frame structure

### 5.1.1 RACH/FACH Channels

RACH/FACH Iur data stream corresponds to the data stream of one specific UE. The used transport bearer is bi-directional.

	<u>Information element</u>	<u>Description</u>	<u>Present on</u>	
			<u>RACH</u>	<u>FACH</u>
<u>Header</u>	<u>Frame Type</u>	<u>RACH/FACH data frame</u>	<u>UL</u> X	<u>DL</u> X
	<u>CRNTI/SRNTI</u>	<u>Used to identify the UE context in the CRNC/SRNC</u>	<u>SRNTI</u>	<u>CRNTI</u>
	<u>FACH Indicator</u>	<u>Indicates if the data in the payload should be sent on the FACH coupled to the RACH (i.e. the payload contains the Cell Update Confirm message), or if it can be sent on a different FACH decided by the CRNC (subsequent user data).</u>		X
	<u>Priority Indicator</u>	<u>Priority indicator corresponding to logical channel type. Used by the CRNC to place the payload in the correct transmit buffer.</u>		X
	<u>Length</u>	<u>Length of the data field</u>	X	X
	<u>Payload</u>	<u>Checksum indicator</u>	<u>See ref. [4] TS 25.427</u>	X
<u>Data</u>		<u>Contains the MAC-c SDU to be sent over the radio interface.</u>	X	X
<u>Data frame checksum</u>		<u>See ref. [4] TS 25.427</u>	X	X
<u>Tail</u>				

Note that the RACH/FACH FP does not facilitate multiplexing of data streams from different UEs onto the same data frame, but does allow multiple UEs to share the same transport bearer.

### 5.1.2 DSCH Channels

## 5.2 Control frame structure

### 5.2.1 RACH/FACH Channels

### 5.2.2 DSCH Channels

## 5.3 Coding

---

# 6 Common Transport Channel Data Streams User Plane Procedures

This chapter specifies the user plane procedures for Common Transport Channels data streams. Typical related scenarios at Iur interface should be described.

For the user plane of the radio network layer there are three Common Transport Channel frame handling protocols:

- Random Access Channel Frame Protocol (RACH FP) for transport of Iur data streams carried on RACH on the Uu-interface.
- Forward Access Channel Frame Protocol (FACH FP) for transport of Iur data streams carried on FACH on the Uu-interface.
- Downlink Shared Channel Frame Protocol (DSCH FP) for transport of Iur data streams carried on DSCH on the Uu-interface.

## 6.1 Data Transfer

### 6.1.1 RACH/FACH Channels

### 6.1.2 DSCH Channels

## 6.2 Flow Control

### 6.2.1 RACH/FACH Channels

## 6.2.2 DSCH Channels

# 7 History

Document history		
0.0.1	February 1999	Document structure proposal
0.0.2	February 1999	Introduction of the related content of Merged description of Iur interface.
0.0.3	March 1999	Revision bars removed. Modifications of the title. CCH have been changed into "Common Transport Channel". Addition of a definition of Common Transport Channels.
0.0.4	April 1999	Removal of temporary reference to Merged Iur specification
0.1.0	April 1999	Removal of revision bars
0.1.1	April 1999	Changes after the 1 <sup>st</sup> review in TSG RAN WG3 #3 meeting.
<u>0.2.0</u>	<u>June 1999</u>	<u>Version approved at TSG RAN WG3#4 meeting. No change.</u>
<u>0.2.1</u>	<u>August 1999</u>	<u>Addition of text on Data Frame structure coming from tdoc R3-99734 section 5.1 agreed with modifications at RAN WG3#5 meeting.</u>
