Title: LS on Outer loop power control

RAN WG2 would like to thank RAN WG1 on their liaison statement on outer loop power control.

RAN WG1 asked if RAN WG2 is considering outer loop power control methods for the uplink.

RAN WG2 has not studied outer loop power control for the uplink so far. This function is located in the UTRAN.

It is possible that signalling over lub or lur would be beneficial to perform this function efficiently, if it is split over Node B and RNC. This requires further studies in RAN WG2 and RAN WG3.
