Title: Liaison Statement to TSG T WG1 & 2: EMC specifications

Document for:

At the meeting #1 RAN WG4 reviewed ARIB Vol.4 (MS specification) and EMC aspects were discussed. It was observed that there are differences of interpretation between ETSI and ARIB on the scope of EMC. As a result of the discussion it was proposed that EMC specifications should be developed for the Mobile Station within 3GPP.

RAN WG4 proposes TSG-T WG1 or WG2 to consider to develop this EMC conformance specification for Terminals, taking into account the regulatory situation in different parts of the world, based on requirements developed in WG4.
