

Agenda Item: 8.7
Source: Nokia
Title: Text addition to General test conditions and declarations part
Document for: Approval

1. Introduction

Because requirements are repeated in two separate document sentence which declares relationship between TS25.141 and TS25.104 is needed in case of updating error. For this reason Nokia has proposed following text added to current TS25.141 specification.

2. Text proposal for ' General test conditions and declarations part ' 4 General test conditions and declarations

The requirements of this clause apply to all tests in this TS, when applicable.

In case of requirement inconsistent between Base station conformance testing (FDD) TS 25.141 and Radio transmission and reception TS25.104 requirements from TS25.104 shall always applied.

Many of the tests in this TS measure a parameter relative to a value which is not fully specified in the UTRA specifications. For these tests, the conformance requirement is determined relative to a nominal value specified by the manufacturer.

Certain functions of a BTS are optional in the UTRA specifications.

When specified in a test, the manufacturer shall declare the nominal value of a parameter, or whether an option is supported.

3. Conclusion

Additional text has been proposed to be used in TS 25.141.
