

Title: LS on Sliding paging occasion

To: TSG RAN WG1

CC:

Source: TSG RAN WG2

RAN WG2 have received the Answer on LS on paging occasions from RAN WG2, and would here like to provide our comments on the sliding paging occasion concept.

RAN WG2 agrees that it is important that the standard enables minimum UE power consumption. The sliding paging occasion concept introduces considerable benefits, with minor additional complexity for the implementation.

WG2 will at its next meeting include in TS 25.304 a description on how to calculate paging occasion, taking the sliding paging occasion concept into account.
