RAN WG1 would like to thank RAN WG3 for the liaison statement on measurements. RAN WG1 would like to inform that the definition of the SIR_{error} measurement can be included in the WG1 specifications, TS 25.215, according to the attached CR. This is done under the assumption that the proposed change is acceptable by RAN WG2 and RAN WG4 as well.

A similar CR is to be produced for TS 25.225.
