CN1 thanks T1 for their liaison T1-000161 (received as N1-001167) to request the review of timing requirements in idle mode.

CN1 has reviewed the timing requirements highlighted in the documents attached in the liaison received from T1. CN1 has introduced no new requirements in the TS 23.122 specification that would require the change of the timings highlighted for review but the introduction of GSM/UMTS dual RAT mobile means that these timings need reviewing. This is not only a CN1 issue but this also affects RAN1, RAN2 and GERAN2 as initial cell selection and cell reselection must be considered.

T1 should therefore request RAN1, RAN2 and GERAN2 working groups to review the timings.

The original T1 liaison and documents sent for review is attached to this liaison for reference.

¹ Please write any action required from the groups in a clear way.
