

**Agenda Item:** 5  
**Source:** Rapporteur (CSELT)  
**Title:** Report of e-mail ad-hoc group on RRM

---

The e-mail discussion on RRM had a start on July, 15<sup>th</sup> with the submission of the documents from CSELT that were not discussed at the last WG2 meeting and with some proposals on how to proceed. Telecom Modus input their contribution on SSDT, proposing the inclusion of the SSDT description in TR 25.922.

**Proposed actions to WG2:**

TSGR2#5(99)579 containing some proposed text for the inclusion into TR 25.922. This text, which is based on the indications given at the Yokohama meeting, had been made available since long time. The proposal to the e-mail group was to include this text in 25.922 since it had been circulated for a while and no comments were received. No objections to this proposal were received during the e-mail discussion and therefore the inclusion of this text (available in TSGR2#6(99)790) into TR 25.922 is now suggested to WG2.

TSGR2#5(99)580 on handover: also this text was available since long time and the proposal to the e-mail group was to include it at the beginning of section 6.1.1.5 of TR 25.922. No objections to this proposal were received during the e-mail discussion and therefore the inclusion of this text (available in TSGR2#6(99)791) into 25.922 is now suggested to WG2.

TSGR2#5(99)675 on Mode control strategies for tx diversity: this is based on TSGR2#5(99)531 discussed at the last meeting. The proposal to the e-mail group was to include this text in a dedicated section of TR 25.922, also considering the decision of WG2 on TSGR2#5(99)531. No objections to this proposal were received during the e-mail discussion and therefore the inclusion of this text (available in TSGR2#6(99)793) into a dedicated section of TR 25.922 is now suggested to WG2.

TSGR2#5(99)559 on SSDT: the parameters that are necessary for SSDT were agreed at the last WG2 meeting (TSGR2#5(99)557) and therefore the proposal to the e-mail group was to include a description of SSDT in TR 25.922. No objections to this proposal were received during the e-mail discussion and therefore the inclusion of the SSDT description into a dedicated section of TR 25.922 is now suggested to WG2.

**Other documents circulated to the e-mail group:**

TSGR2#5(99)582 on Admission Control: no comments were received and no action was proposed. The document is submitted again to this meeting as TSGR2#6(99)792.
