**Title:** Response to Liaison Statements on MExE support of QoS negotiation and handover notifications.

TSG CN1 thank T2 SWG1 MexE for their Liaison Statements on MExE support of QoS negotiation and handover notifications (T2X99100 and T2X101).

TSG CN1 would like to ask for clarification from T2 SWG1 as to the intended use of the requested information so as to enable them to properly formulate a response.

Is it the intention of the MexE application to actually take control of the handover procedures or just to be notified of their occurrence? If it is the former then TSG CN1 would like to express their concern over an application intervening in the control of handover given the timing issues this could present.
