Title: Liaison to 3GPP
Date: 6. April 2000
Document for: Approval
Agenda item: Plenary

LIAISON TO 3GPP TSG SA REGARDING THE NEW ANF TO PERFORMANCE PARAMETERS

ETSI TC STQ prepared a stage 1 description to enhance the signalling protocols for transmitting and updating performance parameters on a per call basis, see attachment. Mobile systems may also be involved in a call.

This document may have a relationship with ETSI TS 101 108 "Tandem Free Operation (TFO) ; Service Description; Stage 1".

Is any further work on this subject planned by 3GPP?

TC STQ would appreciate any comment on this subject.
