

Technical Specification Group Services and System Aspects **TSGS#12(01)0372**

Meeting #12, Stockholm, Sweden, 18-21 June 2001

Source: TSG SA WG2 Chairman and MCC support
Title: Clarifications on S2 open CRs
Agenda Item: 7.2.3

At the initial presentation of S2's inputs to SA#12, concerns were raised concerning some CRs. This paper intends to clarify these concerns, noting that revision of LCS CRs is handled in a separate tdoc (SP-010371).

On 03.60:

<i>CR#</i>	<i>re v</i>	<i>Rel</i>	<i>title</i>	<i>cat</i>	<i>in ver</i>	<i>out ver</i>	<i>S2#</i>	<i>WI</i>
A205	1	R97	Using RAU procedure for MS RAC IE update	F	6.8.0	6.9.0	S2-011471	GPRS
A206	1	R98	Using RAU procedure for MS RAC IE update	A	7.6.0	7.7.0	S2-011472	GPRS

There should be mirror CRs to R99 and Rel4, but the CRs need some adaptations for these Releases. Discussions on these adaptations are still on-going at S2. It is proposed to approve these CRs for R97 and 98 and to present the R99 and Rel4 corresponding CRs at next SA plenary.

On 23.060 Rel4:

<i>CR#</i>	<i>re v</i>	<i>Rel</i>	<i>title</i>	<i>cat</i>	<i>in ver</i>	<i>out ver</i>	<i>S2#</i>	<i>WI</i>
233		R4	Update of Control Plane protocol architecture to align with 29.202	F	4.0.0	4.1.0	S2-011463rev1	TEI4

CR #233 on 23.060 does not require any mirror CR for Rel-99, as TS 29.202 was created only for Rel-4 onwards. The category is corrected from "A" to "F".

In addition to this, the changes agreed by SA#12 during S2's initial presentation (changes of category, CRs not approved) have been considered even if not repeated here.
