Title: CRs to 21.102, 21.103, 41.102, 41.103 to point to replacement specs, and to 21.101 to change title

Document for: decision

If SA agrees to the spec number changes advocated in SP-030235, it is proposed to modify the existing spec list series to remove the lists of specs and replace them with a pointer to the new documents.

Once these CRs have been done, the old, redundant specs:

21.102
 21.103
 41.102
 41.103

should be withdrawn. It may appear rather perverse to change a spec and immediately withdraw it, but there is method in this madness: all versions of specs remain available indefinitely in the “archive” directory of the 3GPP file server

<http://www.3gpp.org/ftp/Specs/archive/>

and if a user of the 3GPP specs was unaware of the change of number, he might mistakenly take the latest version of the old spec as valid, even though it is withdrawn. By making sure that the last versions of these withdrawn specs point to their replacements, this danger is avoided.
