1 Overview

The Open Mobile Alliance (OMA) is developing interoperable mobile Presence and Availability services based on the current work in the IETF SIP, SIMPLE, GEOPRIV and SIPING work groups.

This memo is intended to communicate to the IETF GEOPRIV group a list of dependencies that OMA PAG considers as critical for implementation of the OMA Presence and Availability services and the OMA schedule for this service.

2 Proposal

The OMA PAG schedule proposes that our Presence and Availability specifications be completed by the end of 4Q2004, so it would be most beneficial to have the below specifications completed by that time.

3 Requested Action(s)

The progression of these I-Ds to RFC status within the enclosed schedule is critical to the completion OMA Presence and Availability Service. The OMA PAG group requests that this information be taken into account during the development of these I-Ds. If there are explicit actions OMA can take to assist with the progression of these specifications, please forward that information.

Also, as I-Ds are assigned RFC numbers, we are able to include reference to those RFCs within the OMA Presence and Availability specifications. We would like to request that RFC numbers are assigned and communicated to OMA as soon as possible.

4 Conclusion

Thank You,
Ihab Guirguis, Chair, OMA PAG
