Title: MExE Stage 1 for Release 99

Liaison Statement

T2 MExE is currently finalising MExE Stage 2 for Release 98, and will thus soon require a MExE Stage 1 for Release 99 in order to continue its work for Release 99.

It is noted from the TSG-T work programme that the MExE Release 99 Work Item was adopted on the 4th March 1999. T2 MExE is due to have the first complete draft of the MExE Stage 2/3 for Release 99 by the 22nd September 1999, and TSG-T WG2 approval by the 15th November, 1999. T2 MExE would thus appreciate a MExE Stage 1 for Release 99 by end of August 1999.

T2 MExE notes that the MExE Stage 1 for Release 98 was successfully created with co-operation and joint meetings held between SMG1 and SMG4. T2 MExE suggests that this may be an appropriate way forward to creation of the MExE Stage 1 for Release 99, and would be willing to participate in such work.

S1's views on the matter are welcomed, and T2 MExE looks forward to early completion of the MExE Stage 1 for Release 99.
