Title: LS on Changes to working assumptions

At 3GPP TSG-T WG2#2 meeting in London working assumptions for SMS (T2-99309)and Multi Media Messaging (T2-99311) were produced and sent with an LS to both S1 and S2 (LS T2-99312)

At 3GPP TSG-T WG2#3 in Yokohama it was agreed to modify those working assumptions because it was felt that the current GSM SMS specifications should be adopted for the April 99 3GPP release specifications without change. A new messaging service could be specified in the Multi Media Messaging service which would allow enhancements to be made which would not be possible for the existing GSM SMS specifications.

Attached to this LS are the revised working assumptions:-

SMS working assumptions T2 99420

Multi Media Messaging Working assumptions T2 99421
