

Offline Discussion of FS_MeasureData

ZTE Corporation

✓ **Is the data integrity requirement for OAM interface in RAN sharing scenario already covered in section 8.9 of TS 22.261?**

Y: it is fine to remove this part

N: need more study in SA1

- ✓ **Motivation: To accurately assess the communication service quality for periodic deterministic communication service, e.g. motion control for network operators**
- ✓ **Impact on SA1 impact:**
 - TS 22.261 Section 6.23.2
 - The 5G system shall support an update/refresh rate for real time QoS monitoring with a specified value (e.g., **at least one update per second**).
- ✓ **QoS monitoring: Network measurement data collection + reporting**

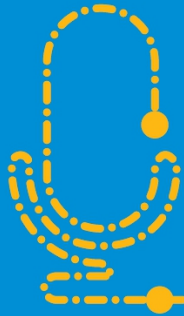

✓ **Option 1**

Revise SID to focus on “Measurement Data Collection” considering various applications requirements.

✓ **Option 2**

mini-WID to argument the exsited QoS monitoring requirements in Section 6.23.2 of TS 22.261

Thank you

Tomorrow never waits
