

Objectives for this meeting

From the contributions we have for this meeting we shall derive working assumptions for aSIP in order to stabilise the TS33.203.

SA3 shall today define working assumptions for:

- 1. Where to terminate authentication (S-CSCF vs HSS)**
- 2. Where to terminate confidentiality**
- 3. Protection mechanisms (IPSec vs SIP-Level)**
- 4. Security Mode Setup**
- 5. Identify issues that need clarification from SA2**
