CHANGE REQUEST

| ⌘ | **33.cde** CR **CRNum** | ⌘ **rev** | **-** | ⌘ | Current version: | **0.1.0** | ⌘ |

*For **HELP** on using this form, see bottom of this page or look at the pop-up text over the ⌘ symbols.*

Proposed change affects: UICC apps⌘ **X**   ME ☐   Radio Access Network ☐   Core Network ☐

Title: ⌘	Removal of the sentence related to a SIM/USIM software application.	
Source: ⌘	Gemplus	
Work item code:⌘	WLAN Interworking Security	***Date:*** ⌘ 02/10/2002
Category: ⌘ **F**		***Release:*** ⌘ Rel-6

Use one of the following categories:
F *(correction)*
A *(corresponds to a correction in an earlier release)*
B *(addition of feature),*
C *(functional modification of feature)*
D *(editorial modification)*
Detailed explanations of the above categories can
be found in 3GPP TR 21.900.

Use one of the following releases:
2	*(GSM Phase 2)*
R96	*(Release 1996)*
R97	*(Release 1997)*
R98	*(Release 1998)*
R99	*(Release 1999)*
Rel-4	*(Release 4)*
Rel-5	*(Release 5)*
Rel-6	*(Release 6)*

Reason for change: ⌘	The SA3#24 meeting report indicates that the sentence, concerning a SIM/USIM software application, has to be removed.
Summary of change:⌘	The sentence concerning the SIM/USIM software application is removed.
Consequences if not approved: ⌘	The remark of the SA3#24 meeting report is not taken into consideration.

Clauses affected: ⌘	Chapter 4.1.2

		Y	N		
Other specs affected: ⌘			X	Other core specifications ⌘	
			X	Test specifications	
			X	O&M Specifications	

Other comments: ⌘	

4.1.2   Network elements

The list below describes the access control related functionality in the network elements of the 3GPP-WLAN interworking reference model:

- the **UE** (potentially equipped with UICC card) utilised by a 3GPP subscriber to access the WLAN interworking service. The UE may be capable of WLAN access only, or it may be capable of both WLAN and 3GPP System access. Some UE may be capable of simultaneous access to both WLAN and 3GPP systems. The UE may include terminal types whose configuration (e.g. interface to a UICC), operation and software environment are not under the exclusive control of the 3GPP system operator.   For instance, the UE may be a laptop computer or PDA with a WLAN card, UICC card reader and suitable software applications, or the UICC may reside in the 3GPP ME and be accessed through Bluetooth, IR or serial cable interface, ~~or the SIM/USIM may be implemented as a software application in a laptop computer or PDA~~. All these alternatives must be carefully studied from a security perspective.
