1. Overall Description:

SA3 would like to thank TSG GERAN for informing SA3 that the work on streaming and conversational service provision over enhanced Gb assumes no inherent need to enhance security. Regarding the possibility to enhance GERAN security for A/Gb mode, SA3 plan to create a Rel-6 work item for this topic for approval at SA#18. The aim of the work item will be to upgrade GERAN security for A/Gb towards the level provided for UMTS. SA3 looks forward to working with TSG GERAN to assess the feasibility of various security upgrade options for A/Gb mode.

2. Actions:
