

3GPP TSG-SA3 LI Meeting #13
Rome, Italy, 14 – 16 April 2004

Tdoc #S3LI04_062r1

CR-Form-v7

CHANGE REQUEST

⌘ 33.108 CR CRNum ⌘ rev - ⌘ Current version: 5.7.0 ⌘

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the ⌘ symbols.

Proposed change affects: UICC apps ME Radio Access Network Core Network

Title:	⌘ WGS 84 coordinates length correction	
Source:	⌘ SA3-LI	
Work item code:	⌘ SEC1-LI	Date: ⌘ 15-04-2004
Category:	⌘ F Use <u>one</u> of the following categories: F (correction) A (corresponds to a correction in an earlier release) B (addition of feature), C (functional modification of feature) D (editorial modification) Detailed explanations of the above categories can be found in 3GPP TR 21.900 .	Release: ⌘ Rel-5 Use <u>one</u> of the following releases: 2 (GSM Phase 2) R96 (Release 1996) R97 (Release 1997) R98 (Release 1998) R99 (Release 1999) Rel-4 (Release 4) Rel-5 (Release 5) Rel-6 (Release 6)

Reason for change:	⌘ In the current version of TS 33.108 the wGS84Coordinates parameter may have a maximum length of 10 octets. This is not in line with the mentioned reference GSM 03.32, in which the coding of e.g. Ellipsoid Point with uncertainty Ellipse allows up to 11 octects. Moreover reference to old GSM 03.32 (last version is in rel-98) breaks self-consistency inside the same release of 3GPP specification.
Summary of change:	⌘ The length of wGS84Coordinates is corrected by removing the size constraint. Reference to GSM 03.32 is replaced by a reference to 3GPP TS 23.032.
Consequences if not approved:	⌘ Wrong information transferred over HI2 interface to LEA.

Clauses affected:	⌘ 2, B.3								
Other specs affected:	⌘ <table border="1" style="display: inline-table; vertical-align: middle;"><tr><td>Y</td><td>N</td></tr><tr><td>X</td><td></td></tr><tr><td>X</td><td></td></tr><tr><td>X</td><td></td></tr></table> Other core specifications ⌘ Other core specifications ⌘ Test specifications ⌘ O&M Specifications ⌘	Y	N	X		X		X	
Y	N								
X									
X									
X									
Other comments:	⌘ In correcting the parameter length, the same approach (removal of size constraint) which was agreed in SA3-LI#12 for QoS parameter is used.

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.
