1. Overall Description:

CN1 would like to inform that it has made a decision on the storage of temporary identities for EAP authentication (i.e. pseudonym, re-authentication identity and associated security parameters). CN1 decision is that the WLAN UE has to store all temporary identities for EAP authentication in the USIM, if appropriate Elementary Files (EF) are available in the USIM cards issued by the operator. If appropriate EFs are not available, then stored in the ME.

2. Actions:

To T3 group.

ACTION: CN1 kindly asks T3 to take into account the points raised above and check the need of changes in the appropriate specification(s).

3. Date of Next TSG-CN1 Meetings:

CN1_35	16 th – 20 th August 2004	Sophia Antipolis, France (ETSI)
CN1_36	15 th – 19 th November 2004	Korea
