1. Overall Description:

33.141 and 33.222 gives options for the authentication proxy to exist either as part of an application server, or as a separate entity.

WG CN1 seeks advice from SA3 on where in the IMS architecture a separate authentication proxy exists (home network or visited network, inside trusted domain or outside the trusted domain).

Is such a separate authentication proxy discovered by the UE?

This information is needed by WG CN1 in order to properly populate the text concerning authentication proxy in 24.141 and 24.147.

2. Actions:

To SA3 group.

ACTION: WG CN1 requests clarification on the above questions.

3. Date of Next TSG-CN1 Meetings:

CN1_35	16th – 20th August 2004	Sophia Antipolis, France (ETSI)
CN1_36	15th – 19th November 2004	Asia?
