1. Overall Description:

SA2 would like to thank SA3 for their LS on "Revisiting forwards compatibility towards TLS based access security".

It is SA2's understanding that IMS Private User Identities and the Home Network Domain Name as stored on the ISIM would normally not be made visible to the user, i.e. from that perspective the new naming requirement would be acceptable from SA2 point of view.

It is not within SA2's expertise and merits to comment whether the new naming restrictions would solve the forward compatibility issues towards TLS based security, but SA2 expect that SA3 finalize the study before approving the new requirements.

2. Actions:

To SA3 group.

ACTION: SA2 kindly asks SA3 to take note of the comments above.

3. Date of Next SA2 Meetings:

SA2 #44	26 th Jan ñ 2 nd February 2005	Europe
SA2 #45	4 th ñ 8 th April 2005	China
