SA3 thanks CN4 for their liaison S3-041046 (N4-041590) on Need for the IMSI at the PDG.

SA3 does not identify any case in which the PDG needs the IMSI. For security purposes, the PDG delegates the authentication tasks to the AAA server. So the identity received in the PDG from the WLAN UE, either if it is readable for the PDG (IMSI) or not (temporary identity), is sent to the AAA server.

Further answers will be provided later by the SA3-LI Subgroup.

Actions:

None.

Date of Next TSG-SA3 Meeting:

SA3#37

21st – 25th February 2005

Sophia Antipolis, France
