1. Overall description:

ETSI ISG NFV thanks 3GPP TSG-SA WG5 for their Liaison Statement on Management of Virtualised Network.

ETSI ISG NFV also looks forward to close co-operation with SA5 on matters of mutual importance. We would therefore like to provide SA5 with the following information on the progress of the MANO Group Specification GS NFV-MAN 001 Network Function Virtualization (NFV) Management and Orchestration.

We expect that the above document will be made publicly available in the open area of the NFV section of the ETSI Portal at <http://docbox.etsi.org/ISG/NFV/Open/> in mid-2014.

It should be noted that documents in the open area are still subject to change. The open area is available to non ETSI members as well as ETSI members.

According to the ETSI documentation process there are further milestones before publication. The earliest date for publication is therefore expected towards the end of December 2014 as part of a concerted release of ISG NFV Group Specifications.

2. Actions:

ETSI ISG NFV asks 3GPP TSG-SA WG5 to take the above information into account in any future work they may undertake relating to FCAPS management of virtualised 3GPP network functions.

3. Date of next meetings of the originator:

NFV#6. 13th – 16th May 2014, Okinawa, Japan.

NFV#7. 29th Jul-01 Aug 2014, Santa Clara CA, USA.

NFV#8. 18th – 21st Nov 2014, Chandler AZ, USA.
