**Subject: LS on authentication test algorithm to be  
implemented in test USIM**

Contact Person: Marc Blommaert(<mailto:Marc.blommaert@siemens.atea.be>)

---

TSG SA3 would like to thank TSG T1 for updating the test algorithm as reported by Liaison Statement T1-010105.

SA3 likes to bring T1 under the attention that the functions f1 and f1\* are identical defined in T1-010082 (CR on 34.108) and consequently the usage of f1 in stead of f1\* during the test of the re-synchronisation procedure is undetectable. The same concern applies to the definition of f5 and f5\*.
