　　Tel. Number:　　　　**+1 512 372 5838**

SA1 has made substantial progress in defining service examples and requirements in the IP Based Multimedia Services Framework Report (TR22.941). The report is very much still a draft and requires further refinement of the existing examples as well as elaboration of additional examples. SA1 work on the Framework Report is ongoing.

However, SA1 is of the opinion that the Framework Report is sufficiently progressed for other groups to begin consideration of input to the Report. Therefore the current version of the Framework Report (version 0.4.0 in SA1-010799) is provided for your information. SA1 respectfully requests that other groups, on which it impacts, begin consideration towards providing input and accordingly include this activity in your work plans.
