1. Overall Description:

SA1 has commenced work on the identification of requirements for the support of Digital Rights Management (DRM).

A Work Item Description has been approved for DRM, and a Stage 1 document to capture requirements is now being drafted as part of Rel. 6. SA1 is not planning to develop any requirements for DRM in Rel. 5.

SA1 will be generating generic DRM requirements suitable for all 3GPP needs. SA1 has received some inputs which it is in the process of considering, and any further input would be appreciated from all 3GPP working groups to assist this process. SA1 will inform other 3GPP working groups of progress and any issues that arise when drafting the requirements.

SA1 looks forwarding to working with SA2, SA3, SA4 and T2 in elaborating the requirements for DRM.
