Title: Changes to 33.210 about the scope

Document for: Discussion/Decision

Agenda Item:

This contribution proposes changes to the scope of the specification in order to allow the use of NDS/IP also to protect e.g. the lu and lur interfaces in IP UTRAN. The changes are edited with change marks against 33.210 v. 0.6.0.

1 Scope

The present document defines the security architecture for the UMTS network domain IP based control plane. The scope of the UMTS network domain control plane security is to cover the control signalling on selected interfaces between in the UMTS ~~core~~ network elements. ~~This also includes protection of IMS control plane on selected interfaces.~~
