3GPP TSG WG3 Security - S3#21   **Tdoc S3-010677**
Sophia Antipolis, France
27-30 November, 2001

Agenda Item:	GSMA Security Group Report
Source:	SG Chairman
Title:	Approval of A5/3 formally by SA3
Document for:	Decision

1   Description

For the past year discussions have taken place between 3GPP and the GSMA about the design and funding of A5/3. It is intended that ETSI SAGE should develop A5/3 in a similar fashion to Kasumi.

The intention is to develop a Kasumi variant that will be suitable for GSM, to be known as A5/3.

Recently we have been informed by ETSI that we can go ahead, and that SA3 should formally note their approval.

2   Request to SA3

That SA3 confirms the requirement to develop A5/3, and this is noted in the minutes.
