1. Overall Description:

SA5 wants to thank SA4 for the LS S4 (02)0484, that provides SA5 with the Draft Work Item Description PSS Rel-6. SA5 appreciates SA4's addition of Charging to the WID for PSS and the offer for fruitful future co-operation on this topic. SA5 wishes to inform SA4 that PSS (Feature number 34001) has also been added to the draft Work Item Description for the "Charging Management" feature, that SA5 will present for approval to the next TSG meeting, SA#18. Under the "Charging Management" feature, a Building Block titled "Charging Management for the service domain" will be proposed at SA#18 that contains a Work Task to cover charging management for the PSS.

SA5 have further reviewed the WID in S4 (02) 0483, and would like to raise the following comments:

- anticipating that the "Charging Management" Feature will be approved at SA#18, this feature should be included in the WID PSS Rel-6 in the list of "Linked work items" (clause 2 of the WID);
- clause 7 of the WID, "Charging Aspects", should be enhanced as follows: "The mobile streaming application will allow various charging models, *e.g. time based, volume based, service usage based.*

2. Actions:

To SA4 group.

ACTION: SA5 SWGB kindly asks the SA4 group to:

Take the above comments into account and modify the WID for PSS Rel-6 accordingly.

3. Date of Next TSG-SA5 Meetings:

Meeting	Date	Location	Host
SA5#32	18 th – 22 nd November 2002	Vienna, Austria	EF3
SA5#33	20 th – 24 th January 2003	Sophia Antipolis, France	ETSI
